TECHNICAL SKILLS

- Programming Languages: Python, C, C++, Java
- Databases: MySQL, PostgreSQL
- Tools & Technologies: Git, Linux/Unix, REST APIs
- Web Technologies: HTML, CSS, JavaScript, TypeScript
- Concepts: Data Structures, Algorithms, Object-Oriented Design, Database Design

RELEVANT COURSEWORK

- Data Structures & Algorithms
- Operating Systems
- Database Systems
- Software Engineering

CERTIFICATIONS

- HTML and CSS - Certiport, April 6, 2024
- C++ Essentials 1 - CISCO Academy, October 5, 2024

SOFT SKILLS

- Problem Solving
- Teamwork
- Communication
- Leadership

INTERESTS

- Software Development
- Artificial Intelligence
- Open Source
- Cloud Computing
- Data Analytics

LANGUAGES KNOWN

- English
- Kannada
- Hindi

EDUCATION

Bachelor of Engineering in Computer Science & Engineering

Poojya Doddappa Appa College of Engineering | VTU | Expected Graduation: 2027

Current CGPA: 7.53

PUC (Science) - Shree Gurunagaleswara Independent PU College, MG Road, Kalaburagi: 91.72%

SSLC - Adarsh Vidyalaya (RMSA), Bheemalli, Kalaburagi: 82.72%

CAREER OBJECTIVE

Computer Science undergraduate with a strong foundation in data structures, algorithms, and database management, and hands-on experience across full-stack development and data-driven analysis. Proficient in Python, Java, SQL, and modern web technologies, with project experience spanning application development and data analysis (satellite imagery, ML-based environmental monitoring). Seeking to apply strong problem-solving and technical skills in a Software Engineering or Data Analyst role, contributing to impactful, technology-driven solutions.

PROJECTS

Library Management System

June 2025

- Built a PHP-MySQL-based system to store and retrieve library book data via user-friendly web forms.
- Designed database structures, handled server-side logic, and integrated front-end and back-end components for seamless data management.
- **Technologies Used:** Web Development, Database Management, PHP Scripting, SQL Querying, Front-End Design, Backend Integration

Fit-Bot AI

- Developed an AI-powered fitness platform that generates personalized workout and diet plans based on user goals, preferences, and available equipment.
- Implemented BMI calculation, personalized exercise recommendations, weekly workout planning, nutrition suggestions, and fitness progress tracking.
- Integrated AI fitness assistance, workout logging, medical-record uploads, and user data management using Supabase.
- **Technologies Used:** React, TypeScript, Supabase, Tailwind CSS, Vite, JavaScript, OpenAI API

Karnataka Welfare Scheme Utilization Analyzer

- Developed a data-driven dashboard to analyze welfare scheme utilization across districts of Karnataka.
- Applied Apriori association rule mining and K-Means clustering to identify scheme underutilization patterns and group districts based on performance.
- Created interactive visualizations, color-coded district maps, scheme comparisons, and automated coverage-gap reports.
- **Technologies Used:** Python, Flask, Pandas, NumPy, Scikit-learn, MLxtend, React, TypeScript, Leaflet
